

EndNote Tutorial Exercise 2: Exporting References from Web of Knowledge

Accessing Web of Knowledge: open Internet Explorer and go to www.cardiff.ac.uk/insrv/eresources/databases. Click on the letter W in the list and then click on Web of Knowledge Service. Then click on the orange button in the centre of the screen labelled 'Click here to access WEB OF KNOWELDGE'.

1. Carry out a search for some information on your subject.
2. Mark at least 5 relevant records by ticking the box to the left of each article in your results list then clicking on **Add to marked list**.
3. When you have finished searching, click on the **Marked List** button at the top of the screen. Click on **Save to EndNote, RefMan, ProCite**.
4. The references should then appear directly in the EndNote library you have open. You will only see the new references which have just been added. Check they have appeared correctly, by double-clicking on the references to view the full details.
5. When you are satisfied that the automatic export from Web of Science has worked satisfactorily, go to **References – Show All References** to view your whole list of references, including those you have added previously.
