

Eco-Champions

Aim

To promote and encourage the reduction in unnecessary energy and water consumption, minimise waste production and ensure efficient recycling of unwanted resources.

Responsible

To Head of School/Department

Objectives

- Be aware and informed of University policies on Energy and Water management, Environment, Waste and Recycling
- Participate in training and awareness sessions on energy and water management and other environmental issues in relation to the University
- Remind staff and students (as appropriate) of the need to reduce energy and water consumption, minimise waste production and recycle unwanted resources.
- Conduct regular checks to ensure the efficient use of energy, in conjunction with ESTAT where appropriate
- Ensure notices on energy, water and other environmental issues are displayed properly
- Liaise with ESTAT, INSRV, OSHEU and/or appropriate colleagues to ensure compliance with best practice in recycling is implemented and maintained
- Contact designated colleagues to assist with resolution of issues and provision of guidance
- Work with the Energy, Water and Waste Working Group to provide data on internal changes which may impact on energy and/or water consumption
