

LINGUISTIC VALIDATION CERTIFICATE

DERMATOLOGY LIFE QUALITY INDEX (DLQI)

This is to certify that **ICON Language Services** conducted the linguistic validation of the **paper** version of the **DLQI** (source file name: **DLQI_AU1.0_eng-GBori**) into **Urdu for India**.

The aim of linguistic validation is to obtain translations that are:

- conceptually equivalent to the original and comparable across languages;
- culturally relevant to the context of the target country;
- easily understood by the people to whom the translated instrument is administered.

This is achieved using a rigorous ISO-17100 certified methodology¹ involving:

- a process which comprises several steps;
- the instrument's developer input on conceptual issues;
- a skilled team recruited by **ICON Language Services** in the target country and headed by a consultant with knowledge of and experience in the field of Clinical Outcome Assessments. The consultant supervises and coordinates the linguistic validation process in his/her country;
- a centralized review process coordinated by **ICON Language Services**, including quality control by linguists and discussions about translation decisions with the consultant at each step of the process.
- cross-cultural harmonisation to ensure common understanding of the instrument's concepts by all participants involved in the process and achieve conceptual equivalence across languages.

The aforementioned translation (filename : DLQI_AU1.0_urd-IN_07MAR2023, dated 07 March 2023) underwent the following steps:

- Forward Translation step – 2 forward translations by qualified translators and reconciliation
- Backtranslation step – 1 backtranslation by a qualified translator
- Developer's Review step
- Cognitive Interview step on 5 patients with eczema
- Proofreading step

ICON Language Services may not be held liable for any changes made on the translation after completion of project **0085-TR-0241** by **ICON Language Services** on **07 March 2023**.

Adrien Bonnier
