1. Programme Structure (curriculum design, programme structure and level, methods of teaching and learning)

Psychiatry is taught across all five years of the course with the main clinical placement in Year 4.

Years 1 and 2 have a case-based learning psychiatry component comprising 2 weeks of review of a case scenario with films and video diaries. This is attended by all 300 students for plenaries and then small groups of 10. Students also have a community placement. There is also some old age psychiatry taught in Year 1 Cognitive Health and Neuroscience case. Year 3 includes a couple of virtual on line psychiatry cases.

The main block of psychiatry teaching is delivered in Year 4 with a one week intro (3 days psychiatry) and 9 weeks on placement, 4 weeks' psychiatry, 3 weeks' neurology and 1 week of ophthalmology. At the end of the block students have 1 week of consolidation during which time they have mock ISCE and give feedback on their learning experience. The feedback has been very good.

There are ssc's offered in Year 2, 3 and 4.

This programme is consistent with teaching at other medical schools in the UK and the programme in Cardiff includes appropriately integrated modules in the earlier clinical years.

- 2. Academic Standards** (comparability with other UK HEIs, achievement of students, any PSRB requirements)

The academic standard is high and consistent with that of other medical schools.

- 3. The Assessment Process** (enabling achievement of aims and learning outcomes; stretch of assessment; comparability of standards between modules of the same level)

Summative and formative testing is carried out

Students have progress tests 3 times per year, the same test is given to years 2,3,4, and 5 so students can see how much knowledge they are gaining over the years. In years 2 and 4 there is an integrated clinical structured exam ICSE combining clinical and procedural skills including psychiatry stations.

During the Year 4 psychiatry placement there are 4 formative supervised learning events: 2 mini-clinical examinations and 2 case-based discussions.

This year I attended the ICSE examination in May 2019. The stations were very good and standardised across the different circuits. There was one station on explaining diagnosis and treatment to a patient with schizophrenia that needs a little modification and this was discussed with the examiners at the time of the examination.

- 4. Examination of Master's Dissertations (if applicable)** (sample of dissertations received, appropriateness of marking schemes, standard of internal marking, classification of awards)

[Where possible please complete this section following the dissertation examining board determining the final award.]

NA

- 5. Year-on-Year Comments**

[Previous External Examiner Reports are available from the Cardiff University Website [here](#).]

There were no changes to comment on this year.

- 6. Preparation for the role of External Examiner (for new External Examiners only)** (appropriateness of briefing provided by the programme team and supporting information, visits to School, ability to meet with students, arrangements for accessing work to review)

NA

7. Noteworthy Practice and Enhancement (good and innovative practice in learning, teaching and assessment; opportunities for enhancement of learning opportunities)

The course and assessment in psychiatry are of a very high standard.

8. Appointment Overview (for retiring External Examiners only) (significant changes in standards, programme/discipline developments, implementation of recommendations, further areas of work)

It has been a pleasure to act as the External Examiner at Cardiff. The programme is of a very high standard and the teaching leads are constantly refining and improving it. The exams are very well organised and I was always provided with all the information that I needed.
