1. Programme Structure

The programme is carefully modelled to support students from a variety of medical professional backgrounds and with wide geographical spread. There is a good blend of formal instruction and self-directed learning with a high teacher/student ratio.

2. Academic Standards

Standards are high. Students are challenged and encouraged. They are expected to achieve in depth knowledge of the subject and to apply this to real life clinical situations. The training is well supported by clinical opportunities and the students are exposed to patients with a wide range of clinical conditions.

3. The Assessment Process

The assessment process is rigorous but fair. Single best answer questions are well structures to examine the candidates understanding of the subject and afford the opportunity to cover the syllabus more extensively. The use of real patients exclusively in the practical examination provides a real world evaluation of competence.

4. Year-on-Year Comments

The programme has built on its strengths and represents a model of delivery of education, training and assessment in Clinical Ultrasound.

5. Preparation / Induction Activity (for new External Examiners only)

6. Noteworthy Practice and Enhancement

The conduct of the practical examination is outstanding delivering both academic rigour as well as providing support to candidates.

7. Appointment Overview (for retiring External Examiners only)
