- Once you have started to complete the questionnaire you will have **14** days in which to submit or the link will expire.

Vaccination Information

Your vaccination history is reviewed as part of your Occupational Health Assessment. It is essential your most up to date vaccination records are provided to inform decision making regarding clinical placement, a key component of your degree course.

Places that may hold information about vaccinations that you have had (there may be a charge):

- Your registered GP practice (if you have newly registered at a practice contact your previous one).
- Previous employer’s Occupational Health Department.
- Travel clinics you attended for ‘holiday’ vaccinations.
- Child Health from the area where you were as a child. If unsure you can contact Cardiff Child Health and they will assist 029 21832077.

If you are unable to obtain your vaccination information prior to submitting the questionnaire please email it as soon as possible to **studenthealth@cardiff.ac.uk** with your full name, date of birth and course you intend to study.
