CAERDYDD

Intercalation

at Cardiff University School of Medicine

Medical students can pause their degree after Year 3 or Year 4, to complete an additional year of study in a medically-related subject of their choosing. They then re-join the MBBCh course, graduating with two degrees.

- Explore an area of your interest in more depth
- Gain valuable research skills that will enhance your CV
- Graduate with a BSc or MSc after successful completion

Gain the skills to stand out from the crowd

An intercalated degree will take you much deeper into a particular area of medicine, and will earn you an additional award on top of your medical degree. Graduate a step closer to your dream career, with transferable research skills, and a network of specialised contacts.

Interested? You're in good company

Around 100 students are able to intercalate at Cardiff University School of Medicine every year. We also welcome intercalating students from other institutions - and if you'd like to explore an intercalation option outside of the University, we'll help you organise that, too.

Choose from a wide range of iBSc and MSc level courses, including:

- Biomedicine
- Pharmacology
- Emergency Pre-hospital and Immediate Care
- Applied and Experimental Clinical Immunology

and many more
