TALKING ABOUT EBOLA

HI, LET'S TALK ABOUT THE OUTBREAK OF EBOLA IN WEST AFRICA.

I'VE BEEN READING ABOUT IT.

IT'S A DEADLY VIRUS THAT HAS KILLED THOUSANDS OF PEOPLE.

WHAT IS EBOLA?

CAN PEOPLE ALSO CATCH IT FROM EACH OTHER?

YES, BY COMING INTO CONTACT WITH THEIR BLOOD, SALIVA OR FAECES.

HOW DO PEOPLE CATCH EBOLA?

BY EATING WILD ANIMALS THAT CARRY THE VIRUS, ESPECIALLY BATS.

PREVENTING EBOLA

I AM EBOLA! MY VICTIMS USUALLY DIE! I AM TRANSMITTED BY BODY FLUIDS... WATCH ME INFECT THESE TWO KIDS!!

HAVE YOU HEARD ABOUT EBOLA?

YES, BUT I DON'T KNOW HOW TO PREVENT IT

DON'T TOUCH OTHER PEOPLE

MAKE SURE YOU WASH WHEN YOU'VE BEEN OUTSIDE

NOT EVEN TO SHAKE HANDS? OKAY, I'LL TRY!

I WILL ALWAYS WASH MY HANDS AND FACE

I'M GETTING OUT OF TOWN!

THESE CHILDREN KNOW ALL MY TRICKS! I CAN'T INFECT THEM!

THE HEALTH VISITOR

CHIEF, DOES ANYONE IN YOUR VILLAGE HAVE SYMPTOMS OF EBOLA?

GO AWAY! WE DON'T NEED YOU HERE!

IF WE DON'T TAKE SICK PEOPLE TO THE CLINIC, THE WHOLE VILLAGE MIGHT BE INFECTED WITH EBOLA!

THAT WOULD BE TERRIBLE!

ABDUL, YOU'VE BEEN SICK FOR THREE DAYS. YOU MUST GO TO THE CLINIC!

WE WILL LOOK AFTER ABDUL AND KEEP HIM ON THE ISOLATION WARD. IF ANYONE ELSE IN YOUR VILLAGE GETS SICK, BRING THEM HERE IMMEDIATELY!

OF COURSE I WILL THANK YOU, DOCTOR!

EBOLA WARD

PLEASE WORK WITH THE HEALTH OFFICIALS TO STOP THE SPREAD OF EBOLA!

EBOLA CAN KILL!

THANKS, CHIEF! YOU REALLY CARE FOR YOUR PEOPLE!

I UNDERSTAND THAT YOU ARE TRYING TO HELP US. WE MUST ALL WORK TOGETHER!
EDUCATION IS OUR BEST DEFENCE

- Professional:
  - Ebola - leave it to the person who has died from Ebola. bluetooth is the burial protocol of the person.
- Avoid funerals and burials.

PROFESSIONALS.

- OR Chlorine
- Hand-wash alcohol-based
- Water soap

- Frequent with hands and face
- Wash your hands.

- Friends:
  - Your family and friends must spread it. To prevent recovery and you have a better chance immediately. You will get medical help.
  - If you feel unwell,

- Bedding:
  - Inclining clothing and touch any of their belongings.
  - Do not go near anyone that does not eat bushmeat.
  - Against Ebola!

HOW TO PROTECT YOURSELF.

- Ebola is caused by bats and monkeys. People eat these animals. Other wild animals, such as bats and monkeys, can also become infected by Ebola.
- They can also become infected by people who eat these animals. Other wild animals, such as bats and monkeys, can also become infected by Ebola.
- Touching something.
- Fever, headache, muscle pain and diarrhea. Vomiting, stomach pain and unexplained bruising or bleeding.
- Most of the people that are infected.
- The symptoms are fever, headache, muscle pain and diarrhea. Vomiting, stomach pain and unexplained bruising or bleeding.
- There is no vaccine or cure for Ebola.

WHAT IS EBOLA?

WHAT IS EBOLA?

PLEASE LISTEN TO THE FACTS

PLEASE LISTEN TO THE FACTS

- Ebola is a serious illness that kills.
- Scientists are working hard to produce one.
