

# World Sepsis Day - 13 September 2019

## Sepsis: A spotlight on what can happen to mum and baby

Seminar Room & Sepsis Engagement Centre, Sir Geraint Evans Cardiovascular Research Building, Heath Park

*Sepsis is a life threatening condition from infection that can affect anybody at any age. However, it is more common in vulnerable populations such as the very young and very old. What is often not recognised is the significance of sepsis in pregnancy. Here we tell Amanda's story about a mother and baby who were severely affected by sepsis.*

### Programme

Session Chair: Matthias Eberl

- 14:00      Welcome  
*Professor Peter Ghazal*
