## MPharm Master of Pharmacy

Study at one of the top schools of pharmacy in the UK

Our internationally respected course seamlessly integrates science with therapeutics and clinical practice. Focused on the profession of pharmacy, it could be the perfect springboard upon which to begin your chosen career.

Our MPharm programme is accredited by the General Pharmaceutical Council (GPhC)

[www.cardiff.ac.uk/pharmacy](http://www.cardiff.ac.uk/pharmacy)

# Master of Pharmacy

A four year, full time, degree programme accredited by the General Pharmaceutical Council.

Typical entry requirements: A-Level grades AAB-ABB including Chemistry or Biology followed by Chemistry/Biology, Physics or Maths, then any other third A Level (except Critical Thinking or General Studies). We accept the Welsh Baccalaureate Advanced Skills Challenge Certificate in lieu of one A-Level (at the grades listed above), International Baccalaureate (34 points), and alternative equivalent/overseas qualifications. Please check our website for full requirements.

## Key features

In our close-knit, self-contained and welcoming School:

- You'll be taught by an academic team who carry out cutting-edge, world-leading, research.
- You'll learn from expert practitioners based in community, hospital, primary care and industrial settings who'll give you a thorough understanding of the profession of pharmacy.
- You'll learn with students from other healthcare disciplines through our innovative interprofessional education.
- You'll undertake a range of work-based placements to broaden your knowledge and professional experience.

## Career prospects

Pharmacists are involved in many aspects of medicine preparation and use, from drug discovery to supplying medication to patients. Pharmacists also have a role in optimising drug therapy and, with further training, can now prescribe medicines independently of a doctor.

Once a qualified pharmacist, you'll have a wide choice of career options open to you.

## Becoming a qualified pharmacist

After completing our MPharm degree, you can apply for the pre-registration year. Once completed and you have passed the GPhC's registration assessment, you'll be eligible to register as a qualified pharmacist.

**For many years, 100% of our graduates who have applied for pre-registration pharmacy training have been successful in securing a training place.**

*"I chose to study Pharmacy at Cardiff because it has an excellent international reputation. The course is centred around the students and it has prepared me for my future career. Cardiff University is one of the highest ranking universities for pharmacy in the UK and now I know why it deserves such recognition."*

**Declan Tan Yi Kai, MPharm Graduate**
